What does the Fund invest in?

This Fund invests primarily in fixed-income securities of Canadian governments and corporate issuers. Up to 20% of the Fund may be invested in foreign securities. Until such time as the Fund reaches a sufficient asset size to achieve appropriate portfolio diversification, the Portfolio Manager intends to achieve the Fund’s objectives by investing in I-Class units of the Portfolio Advisor’s Income Fund (the “Underlying Fund”), another mutual fund managed by the Portfolio Manager which has substantially similar investment objectives and strategies to the Fund.

How Risky is it?

The value of the Fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund’s returns change over time. This is called “volatility”.

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

No guarantees

Like most mutual funds, this Fund doesn’t have any guarantees. You may not get back the amount of money you invest.

Risk rating

Educators Financial Group has rated the volatility of the Fund as low.

This rating is based on how much the Fund’s returns have changed from year to year. It doesn’t tell you how volatile the Fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the Fund’s returns, see the Investment Risk Classification Methodology section of the Fund’s simplified prospectus.
